

Kyushu Univ.
April 1, 2023

To: Heads of Departments and Agencies

Office for Promotion of
Environmental Management,
Health and Safety
Division Head for High-Pressure Gas Safety
Takahiro Umeno

Director of Low Temperature Center
Takanobu Kisu

FY2023 Seminar for the Safe Handling of High-Pressure Gases and Liquefied Gases (Notice)

As part of the safety education based on the High-Pressure Gas Safety Act and the Kyushu University High Pressure Gas Hazard Prevention Regulations, the following workshop will be held. All persons (faculty, staff and students) who handle high-pressure gas on campus are eligible for this seminar.

High-pressure gas: Compressed gas at 1.0 MPa or higher (0.2 MPa for acetylene) and liquefied gas such as liquid nitrogen.

Course Content	How to hold an event	Holding period	target group
① Basic training	e-learning	Held throughout the year (April 1, 2023 - March 31, 2024)	All persons who handle high-pressure gas
② Practical skills training	opposing (traffic, etc.)	Scheduled to be held around November	Applicants who have passed test ① above

1. Basic training

The course will be conducted by e-learning using Moodle. Please visit the training page below to take the course.

<https://moodle.s.kyushu-u.ac.jp/course/view.php?id=15754>

※After viewing the video, persons must pass a quiz to be placed on the list of successful applicants.

※Registration on the list of successful applicants is required to use the cold ordering system at the Low Temperature Center.

2. Practical skills training

The above information will be sent by e-mail to those who are on the list of successful applicants. This seminar is offered to those who wish to attend. Please apply if you wish to attend.

[Current schedule]

Date : Around November (Information will be available around October)

Description: To be held in the Ito Campus, Hospital Campus, and Chikushi Campus for about 30 people each.

Lecture contents :

- (1) How to handle high-pressure gas cylinders
- (2) How to handle cryogen
- (3) How to use pipe fitting

3. precautions

Those who plan attending the "Hydrogen Storage Center High-Pressure Gas User Seminar" to be held at the School of Engineering do not necessarily need to attend this seminar, as the content will overlap with the seminar.
